The Ward Management Group, Inc. Secures New Client

(INDIANAPOLIS, IN) — The Ward Management Group, Inc. is pleased to announce that effective August 20, 2010, it has contracted to provide comprehensive management services for the Digital Pathology Association (DPA).

The mission of the Digital Pathology Association is to facilitate education and awareness of digital pathology applications in healthcare. Members are encouraged to share best practices and promote the use of the technology among colleagues in order to demonstrate efficiencies, awareness, and its ultimate benefits to patient care. Goals of the DPA include supporting digital pathology education initiatives, defining best practices, influencing standards and interfaces, and through the organization and delivery of the Pathology Visions Conference, to address diverse needs within the industry.

The Ward Management Group is an association management firm, headquartered in Indianapolis, specializing in organizational management, strategic planning, and non-profit consultative services. The Ward Management Group's primary purpose is to facilitate the association of friends, allies, and partners in the mutual interest of the organized body and its members. In 2009, the Ward Management Group was awarded accreditation from the AMC Institute, the global trade association representing the association management industry. Among 500-plus AMCs worldwide, fewer than 50 have achieved *AMC Institute Accreditation*, demonstrating the commitment and the ability to deliver the highest level of professional management services to association and not-for-profit clients.

“For over 15 years, our goal has been simply to create an environment wherein the members of an association become better for having been a part of something larger than their individual world,” said Michael F. Ward, CAE, Founder and President of the Ward Management Group. “Our accreditation not only demonstrates our continued commitment to top industry standards, but also to providing the best service and programs to our clients. We look forward to the opportunity to partner with the DPA and its board of directors to not only meet, but exceed the expectations of the members of the association,” he added.
